

## LIQUID POOL COVER

Introducing the **ONLY** liquid pool cover in Cyprus

**Exclusive to H2Owen Ltd**

Only €19.95 incl vat

EcoSavr Liquid Solar Pool Cover is a small disposable plastic fish containing Heat Saver liquid. The product is dispensed through a patented valve in the fin and forms a transparent, one molecule thick layer on your pool.

The liquid is biodegradable, odourless, safe and undetectable by users. The EcoSavr Solar Fish is an effective liquid solar pool cover product that greatly reduces **heat loss** and **evaporation** from your exposed pool surface.

Heatsavr™ is filter friendly, does not affect the chemical balance (PH, chlorine, alkalinity) of the water, will not damage vinyl liners or any other pool surfaces, and is absolutely harmless to skin contact.

It works 24 hours a day, even while people are swimming!

1 EcoSavr fish will treat a pool of up to 40sq m for up to a month

- Replaces your conventional pool blanket
- Just snip the fin, squeeze out any air and put into your pool
- Keep your pool warmer, longer
- Save water by reducing **evaporation**

**EXTEND THE USE OF YOUR POOL OVER THE COOLER MONTHS AND SAVE WATER!**
